Meeting Information

The purpose of the meetings is to: (1) provide information about the proposed project and the state's high-voltage transmission line certificate of need process; and (2) provide an opportunity to participate in developing the scope of the environmental report. This includes commenting on issues or concerns related to the proposed project and proposing system alternatives for consideration.

Open House

Doors will open one hour prior to each meeting. Attendees will have an opportunity to review maps and materials for the project and ask questions of state staff and the Applicant. **During this time, comments made by attendees will become a part of the record for Commission consideration only if the attendee submits the comment in writing.** Forms will be available for this purpose.

Formal Meeting

During the formal public meeting, state staff will make a presentation on the state's certificate of need and environmental report processes, and the Applicants will provide a summary of the proposed project. After the presentations, attendees will have the opportunity to offer oral and written comments on the record. **The meetings will end when all present attendees have commented and all other business has been concluded, or the scheduled end time of the meeting, whichever occurs first.** The information presented will be the same at all meetings.

Written Comment Period

Written comments will be accepted through **May 20, 2026, by 4:30 p.m.** Please include the docket number (25-117) in all communications. Comments received after the close of the comment period may or may not be considered by the Commission.

Please focus your comments on information that will help answer the following questions:

- Are there other ways to meet the stated need for the project, for example, a different-sized transmission line, a different type of facility, or a different timing for the proposal?
- What potential human and environmental impacts or unique characteristics of the proposed project should be considered in the environmental report?
- Are there any methods to minimize, mitigate, or avoid potential impacts of the proposed project that should be considered in the environmental report?

Comments may be submitted:

Email: consumer.puc@state.mn.us

U.S. Mail: Consumer Affairs Office
Minnesota Public Utilities Commission

Project Description

The PowerOn Midwest Project would involve constructing and operating new high-voltage electric transmission lines (765 kV and 345 kV) across southern Minnesota as part of a broader proposed 3,600-mile new and upgraded regional transmission network in the Midwest.

In Minnesota, the PowerOn Midwest Project would include the following components:

1. Approximately 271 miles of new single-circuit 765 kV high-voltage transmission lines proposed between:
 - South Dakota/Minnesota border → Lakefield Junction Substation (Jackson County) (approximately 92 miles)
 - Lakefield Junction Substation → Minnesota/Iowa border (approximately 18 miles)
 - Lakefield Junction Substation → Pleasant Valley Substation (Mower County) (approximately 130 miles)
 - Pleasant Valley Substation → North Rochester Substation (Goodhue County) (approximately 31 miles)

2. Approximately 31 miles of new 345 kV circuit between: Pleasant Valley Substation → North Rochester Substation, by replacing existing single-circuit structures with new double-circuit-capable structures.
3. A second 345 kV circuit (approximately 38 miles) added between: North Rochester Substation → Hampton Substation (Dakota County), using the existing double-circuit-capable structures.
4. Expansions and upgrades at Lakefield Junction, Pleasant Valley, North Rochester, and Hampton substations, including 345 kV transmission line connections between select existing and expanded substations.

At this time, the Applicants have not developed proposed routes for the public to consider and provide comments on. Applicants expect to file separate route permit applications with the Commission in the first quarter of 2027. The Commission will review these applications as separate proceedings under Minnesota Statutes Chapter 216I and will hold meetings and hearings on the route permit applications, providing an opportunity for the public to comment at that time.

The project is part of the Midcontinent Independent System Operator (MISO) Long Range Transmission Planning Tranche 2.1 projects, approved in July 2024 under the MISO Transmission Expansion Plan 2024 (MTEP24). MISO and the Applicants have identified a need for up to 10,000 megawatts of additional electrical transmission capacity in Minnesota.

As described in the Certificate of Need Application and the MTEP24, the project is intended to:

- Address projected electric reliability overloads and provide support for compliance with national electric reliability standards;
- Improve efficiency and stability in meeting current and future state and regional reliability needs;
- Provide transmission capacity to serve forecasted residential, commercial, and industrial demand, supporting Minnesota's and the Midwest region's long-term growth; and
- Support replacing aging or cost-inefficient generation with new generation resources, including carbon-free generation, while maintaining system reliability.

Review Process

The Commission must approve a certificate of need before the project can be constructed. The review process includes environmental review and public hearings.

Environmental Review. The Commission is tasked with preparing an environmental report as part of the certificate of need application review process. The environmental report must contain the information outlined in Minn. R. 7849.1500, which includes the potential human and environmental impacts of the proposed project as well as the evaluation of alternatives such as no-build, demand-side management, purchased power, different-sized facilities, upgrading existing facilities, generation instead of transmission, and renewable energy alternatives.

Public Hearings. After the environmental report is prepared, public hearings will be held throughout the proposed project area. The hearings will be presided over by an administrative law judge from the Court of Administrative Hearings. At the hearings, members of the public will have an opportunity to make an oral presentation, present evidence, and ask questions of the Applicants and state staff. Upon completion of the public hearing process, the Commission will make a final decision on whether to issue a certificate of need.

Additional Information

Minnesota Statutes and Rules. This project is being reviewed under Minnesota Statutes Chapter 216B.243 and Minnesota Rules chapters 7829 and 7849. The statutes and rules are available for review at: revisor.mn.gov.

Review Process. Information on the certificate of need review process for large energy infrastructure facilities is available on the Commission's website at: puc.eip.mn.gov/certificates-of-need.

Filing Requirements. Utilities, telecommunications carriers, official parties, and state agencies are required to file documents using the Commission's electronic filing system (eFiling).
